Description

The Unique series has been developed to offer solutions, on an individualised basis, for each shower area. We find the freedom to define the form of a given area, alongside the ability to call upon different drainage types and positions. The concept allows for the best possible aesthetic and functional results to be brought together, with the aim of being able to offer the customer the most satisfactory shower experience available. Unique is a solution for the shower area designer, backed up by product specialists, which allows for a maximum level of individualization to be achieved.

Formats

(70-130)x(70-230*)

(*) Up to 400 cm in length through the assembly of two coordinated units

Material

· Scene®. A solid, homogeneous material with a renewable surface
· Marmek®. A material composed of resin and mineral loads
